Hiring Manager
VistaShare LLC
Harrisonburg, VA

Dear Hiring Manager,

I'm writing to express my interest in a junior web developer position at VistaShare. As a Computer Science major at Bridgewater College with a strong foundation in full-stack development, graphics programming, and interactive tool design, I'm excited about the opportunity to contribute to a team that builds thoughtful, user-centered software.

Much of my work has focused on creating tools that help people learn, create, or collaborate more effectively. I co-created Code Otter, a full-stack web development learning platform now used in Bridgewater's Web Design course. I built the lesson system, virtual tutor interface, designed lessons, and the project won first place in Bridgewater College's Showker Prize. Seeing it used in real classrooms taught me how to design software that is reliable, intuitive, and genuinely helpful to its users.

In addition to development experience, I've spent several years tutoring and mentoring other students in programming. I've learned how to explain complex ideas clearly, adapt to different learning styles, and support others in debugging and problem-solving. These communication skills help me collaborate effectively on technical teams.

I'm excited about the possibility of contributing to VistaShare's mission and continuing to grow as a developer. Thank you for considering my application. I would welcome the opportunity to discuss how my experience and enthusiasm for building thoughtful software could support your team.

Sincerely,
Caleb Early
